SHIRLEY TEMPLE

ZUNI, the flower shown on the front cover, has won much acclaim as an exhibition smoky the past year and the demand has been so heavy that small bulbs are about sold out. A fair supply of larger sizes and bulblets is still available.

Since last year's catalogue was issued a new member has joined the Gladland firm and it is with much pleasure that I introduce you to my wife. She could not be persuaded to allow the use of her picture alone and while she assented reluctantly to the use of the present snapshot, this is the best I could do and is the reason for my own likeness appearing again. While this catalogue is not up to standard size, perhaps with the added assistance that I shall now have, a more complete edition can be offered again in the near future. Thanking all of you for your past patronage, I remain,

Yours for better Glads.

GRANT E. MITSCH.

FOREWORD

Again as last year, my catalogue is small and rather incomplete although I had hoped to give more lengthy and detailed descriptions this year. With two rather adverse blooming seasons in succession, I am unable to give my usual opinions relative to many of the new varieties and the descriptions in most cases have been confined to a few words.

Although the catalogue is small this year, it does not indicate a small crop of bulbs—in reality, a far larger crop of bulbs is a contributing reason for the smaller catalogue.

At this time I wish to thank all my customers and friends for their patronage of the past and although at times I have not been able to thank you personally for each letter I have received, they have nevertheless been appreciated.

Visitors are welcome to my gardens during the blooming season from July to October, the most varieties usually being in bloom in August. No business transacted Sundays.

TERMS: Please send cash or 25% down and the balance may be remitted before delivery or the bulbs sent C. O. D. for the remainder. Remittance may be made in money order, bank draft, check, or, in the case of small orders in currency or stamps but stamps should preferably be sent in 3, 5 cents, and air mail denominations.

Five bulbs may be purchased at the 10 rate and 25 at the 100 rate unless otherwise priced providing such items do not total less than 10 cents. Prices prepaid in the United States on orders over \$1.00 and elsewhere on orders over \$2.50. Orders are preferably held until March 1st except Pacific Coast orders and large wholesale orders; however, shipment by express may be made at any time during the winter if the customer wishes to pay express. I will pay express on retail orders over \$10.00.

DISCOUNTS: 10% discount on orders of \$5.00 or over if accompanied by cash and 15% discount on orders over \$20.00. These discounts do not apply to bulbs in the wholesale list. If discount is not deducted by the customer, I endeavor to send something extra that will be satisfactory. Discounts do not apply to collections.

I aim to send out only healthy stock free from thrips and other pests. My stock has been fumigated and I aim to send out only bulbs that will give satisfaction. I am glad to make adjustment where the fault is mine. Bulblets are not guaranteed to grow but most of my customers have good results with them.

SUBSTITUTION: Please state whether to substitute if out of a size or variety and give second choice if you have any.

All interested in the newer varieties of Iris are invited to send for my list of novelty Iris and Daffodils in June.

I frequently exchange bulbs for books on Natural History and am especially interested in books on Birds, Insects, and Snakes. If interested, write for a list of my wants in this line.

MITSCH INTRODUCTIONS

While I had fully planned on introducing two or three new Glads this year, after considerable deliberation following two adverse growing seasons, I am a little dubious as to whether these seedlings will be equal to the best of my 1937 introductions and I have decided to hold them over for another year. However, I am going to send out one of these seedlings with each order for \$5.00 or more that I receive this year and two seedling bulbs or more with orders for \$10.00 and upwards provided you request them for trial. One of these seedlings, No. 31C294/1 is perhaps the most beautiful pink and white ruffled Glad that I have seen but it has one or two faults; however, it has not been grown under anything like ideal conditions for several years.

My 1937 introductions have been very well received and I have had many more comments on these from pleased customers than on any previous introductions. Rima especially is very popular and Zuni and Conquest have come in for a good share of honors. Colossus and Irak, too, are recipients of very fine reports. Aachen was sent out in very limited numbers and it may prove a bit more temperamental than the others.

The older variety Flaming Meteor becomes more popular each year and I believe commercial growers would do well to stock this rather heavily. Siegfried has won a number of prizes last year and while distinctly a novelty, is a favorite in some places, particularly in England.

AACHEN. A beautiful daintily ruffled lustrous cream Glad. A seedling from Picardy crossed with Barth's La Paloma and rather similar in size and shape to Picardy. Sometimes a little stubby but at its best, this is the most beautiful cream Glad I have seen. However, it may prove to give too large a percentage of short flower heads. **L. \$3.00 each; M. \$2.00 each; S. \$1.00 each; Blts. 30c each.**

IRAK. A grey sport of Bagdad which seems to be like its parent in every way except color. Perhaps every seedling grower who has worked much with smokies has had the experience of growing some beautiful greys only to find them very poor growers and propagators after the first year or two. Irak is both vigorous and prolific. A very fine and beautiful flower. A few people may not care for it at first sight but I think it will be quite generally popular. My stock was small last year and I am asking the same price again this year. **50c per bulb or \$4.00 per 10 of any size.**

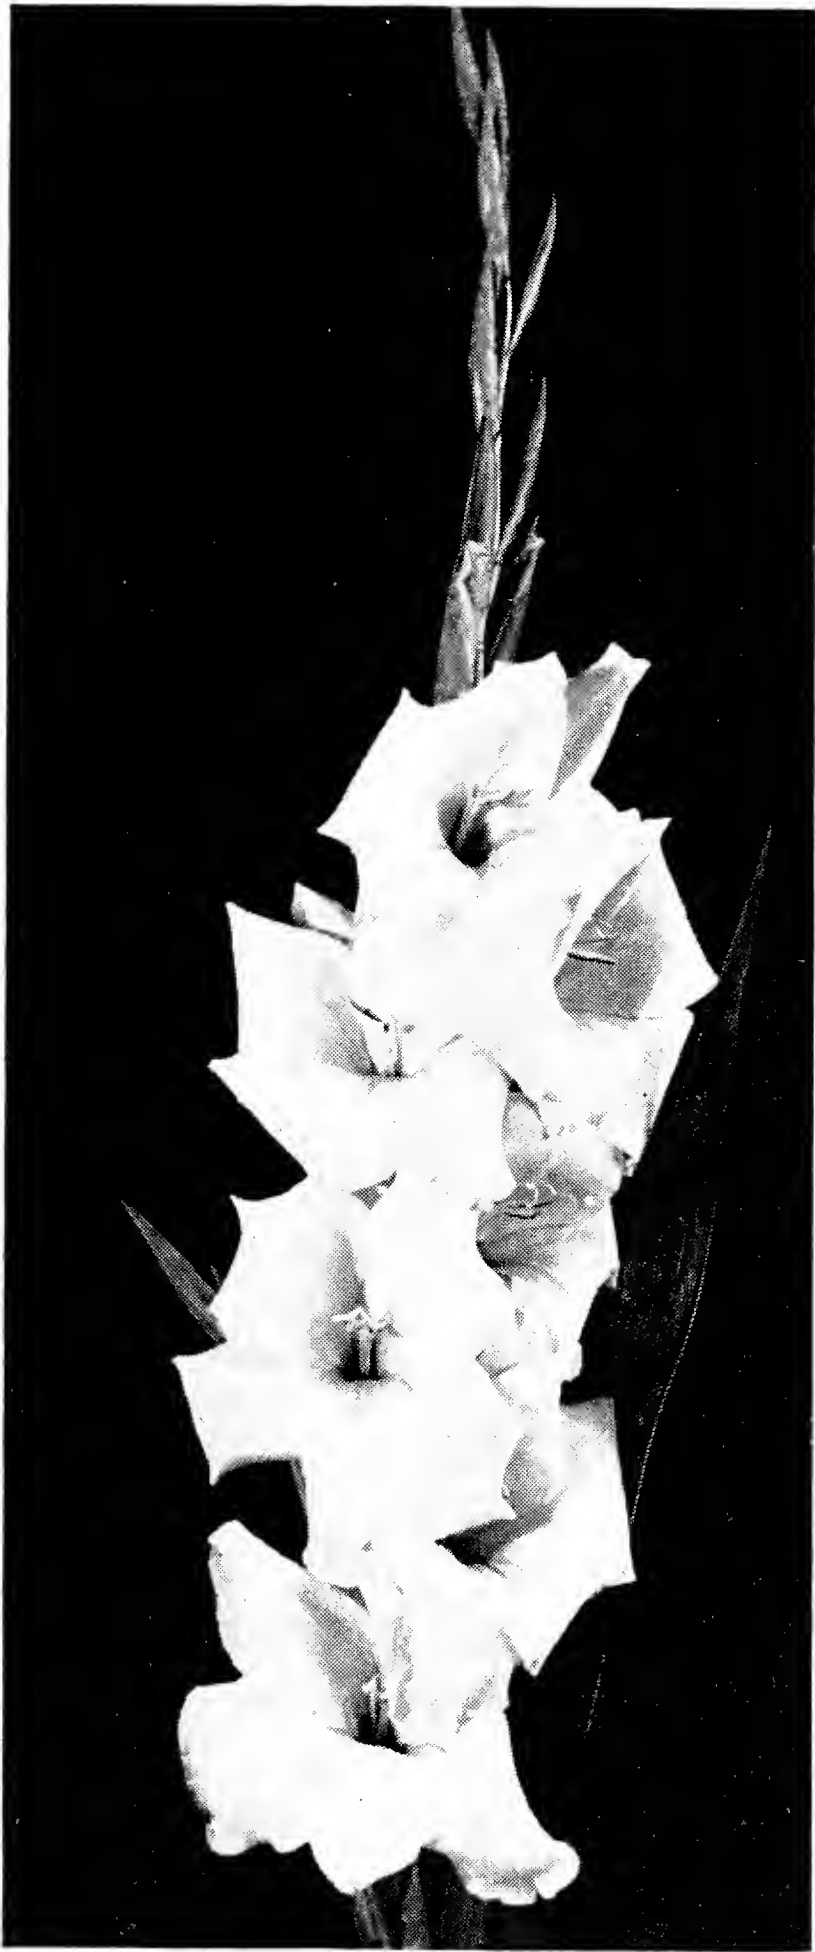

"Irak I like. It is typically Bagdad except for color which is an improvement over the parent." J. T. Robertson, Washington.

RIMA. This harmonious blending of lilac and rose pink with light throat is one of the most beautiful of the pastel colored Glads. One of the most lovely colors indoors, particularly under artificial light. Tall straight spikes with five to seven large blooms open. Although delicate in color, it is a rugged grower and has proven good in dry hot sections of the country. Probably the finest commercial I have introduced. Quite a good propagator. **Large bulbs, \$3.00 each, 10 for \$24.00; M. \$2.00 each, 10 for \$16.00; S. \$1.00 each, 10 for \$8.00; Blts. 30c each, 10 for \$2.40, 100 for \$19.20.**

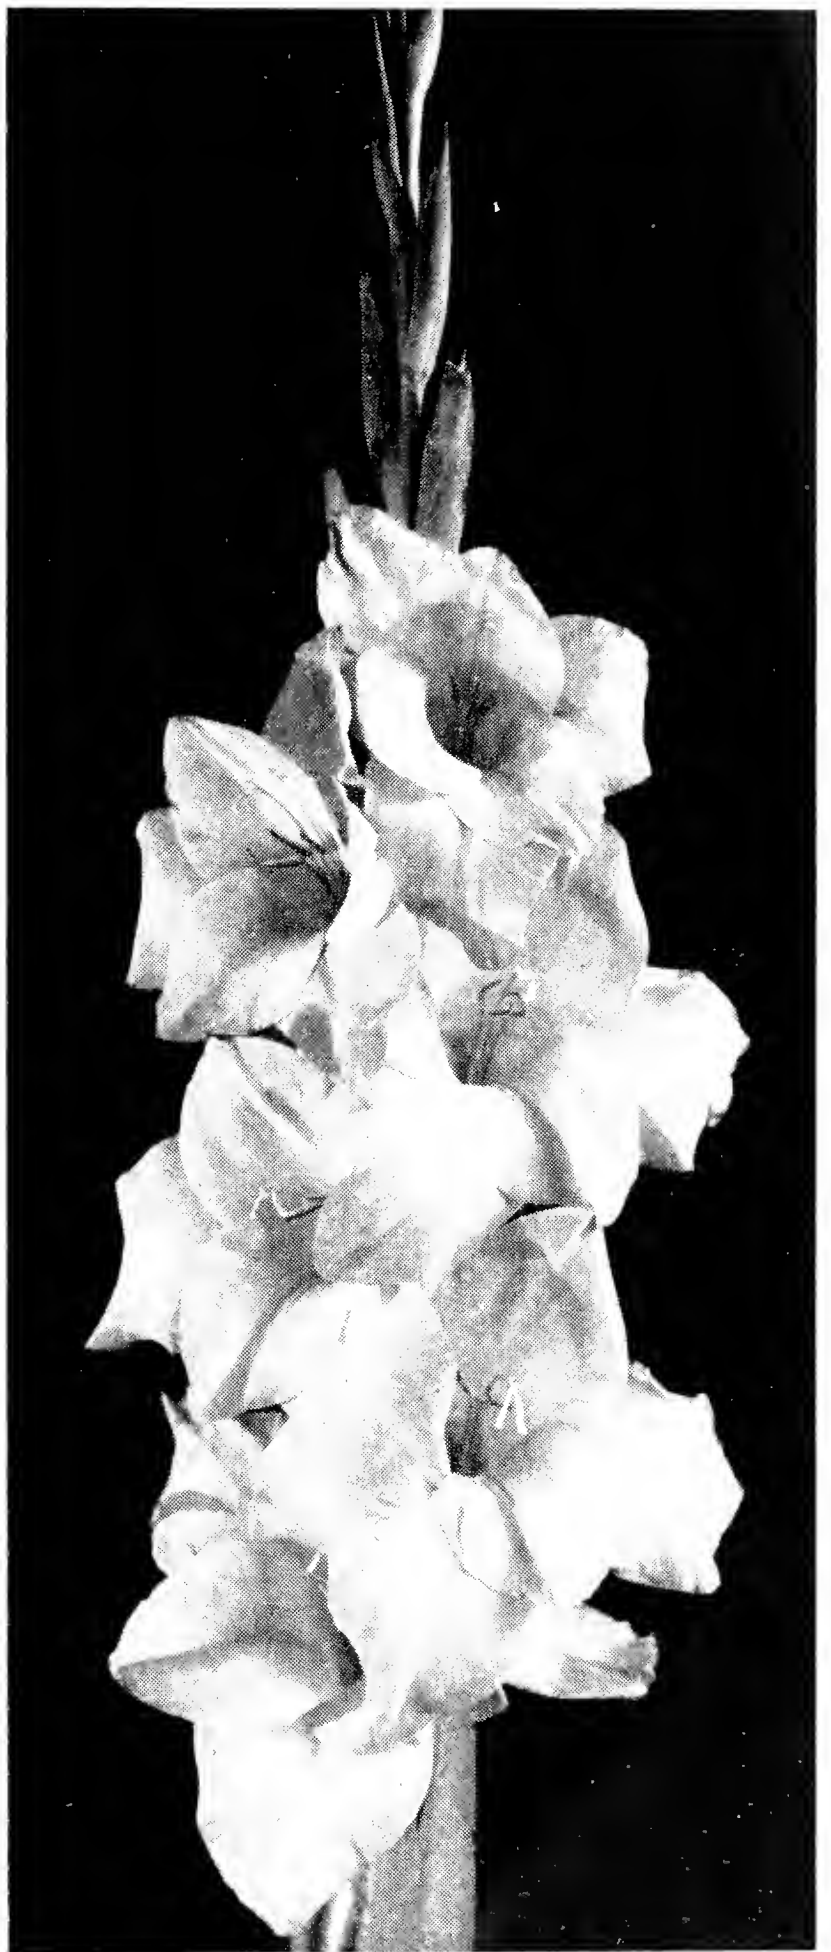

"When I stood and looked at one of my Rima spikes, I felt like asking visitors to remove their hats and make a bow. For while it is modest in coloring, it has all the form and bearing of an aristocrat." Rev. G. A. Gray, Ore.

"I like Rima very much indeed. It gets so hot and dry here and we have so few varieties that can stand up, and I'm glad when I find one that is good here." Foss Heaton, Iowa.

"Unquestionably the finest Glad that grew in our garden this year was Rima. Unfortunately, we had only one bulb and the bloom had passed its peak when the one show where we hoped to exhibit this spike took place. It had 22 buds, however, every one of

RIMA

IRAK

which opened, and after the lower florets had been removed, we still had two 7-inch florets half way up the spike." Geo. W. Jaap, Ohio.

"Yesterday the tiny bulb of Rima came into bloom. Today, Mr. ——— came over to see my garden and picked this out as the finest thing he saw there." Harold E. Janes, Wis.

Rima was rated very high by Mr. E. A. Lins of the Legion Trial Grounds in Wisconsin and won prizes for him after being held on cold storage for some time. It received a Card of Commendation from the Maryland Test Garden in 1936.

ZUNI. A very richly colored smoky Glad. A refined combination of salmon and slate with inconspicuous light orange salmon feather. Florets medium to large in size with up to ten or twelve open on a long spike. About the most evenly and delicately ruffled of any Glad I know. Strong vigorous grower and rapid propagator. L. \$3.00 each, 10 for \$24.00; M. \$2.00 each, 10 for \$16.00; S. \$1.00 each, 10 for \$8.00; Blts. 30c each, 10 for \$2.40, 100 for \$19.20.

"Zuni is the most beautiful smoky I have ever had." Harold R. Sheedy, N. H.

"There is no doubt that Zuni is a grand smoky. Most smokies are just smokies and have nothing but odd color. Zuni is decidedly different and it surely has character and above all real beauty. All who have seen it think it is grand." Al Bork, N. J.

"I liked Zuni immensely; the colors are very lovely in those soft yet striking tones and the combination is most artistic, and the placement is perfect—with ten open the spike is a sight for sore eyes. I do not know of any smoky more lovely and I think that Zuni will go a long way." Dr. Geo. H. Scheer, Wis.

"Next was Zuni with 10 open; it is the most beautiful smoky I've seen, easily the most outstanding of your 1937 introductions I've seen." Paul Brandon, Ore.

Zuni won an Award of Merit at the Maryland Test Gardens in 1937.

COLOSSUS. A very large Glad, sometimes growing to 8 inches across. Moreover, a very early flower usually. A rich pink with small red feather on a cream ground. Sometimes lightly flecked or shaded slate but usually clear. Very prolific. Makes a good cut flower. L. \$3.00 each, 10 for \$24.00; M. \$2.00 each, 10 for \$16.00; S. \$1.00 each, 10 for \$8.00; Blts. 30c each, 10 for \$2.40, 100 for \$19.20.

"Colossus is by far the largest Gladiolus I have ever grown, much larger than ——— or ——— and the color is a great improvement over either one of those." Humphrey F. Hedgecok, N. Y.

"Your Colossus came out just two or three days too late for that show. It was a wonderful spike—large, well placed, perfect in every way." W. W. Wyman, Mass.

"Colossus was 5 ft. tall; spike at cutting 37 inches; at last bloom, 43 inches long. Largest floweret 8 inches in diameter." Rev. E. G. Pfeiffer, Wis.

"Colossus . . . had six enormous blooms. The plant, stalk and flowers were all very large, and I thought the color was very beautiful. Colossus was certainly one of the most outstanding of the new varieties I raised." Max A. Hughes, Wyoming.

In addition to the above I have several letters stating that Colossus was the first to bloom or one of the first.

CONQUEST. Light salmon pink with cream blotches. A very pleasing color combination in a good sized well opened ruffled flower. Florets of good texture on long tapering spikes. Five or six very refined flowers open. A heavy propagator. L. \$1.50 each, 10 for \$12.00; M. \$1.00 each, 10 for \$8.00; S. 50c each, 10 for \$4.00; Blts. 15c each, 10 for \$1.20, 100 for \$9.60.

"Conquest is certainly a lovely color." Paul Brandon, Ore.

"I saw your Conquest at Havre de Grace looking very fine. The bulb you sent me made a very nice spike." W. G. Herridge, Maryland.

"Conquest is the best in its color class that I have seen and exceedingly beautiful. I wish I had thousands of it." Fred W. Gray, W. Va.

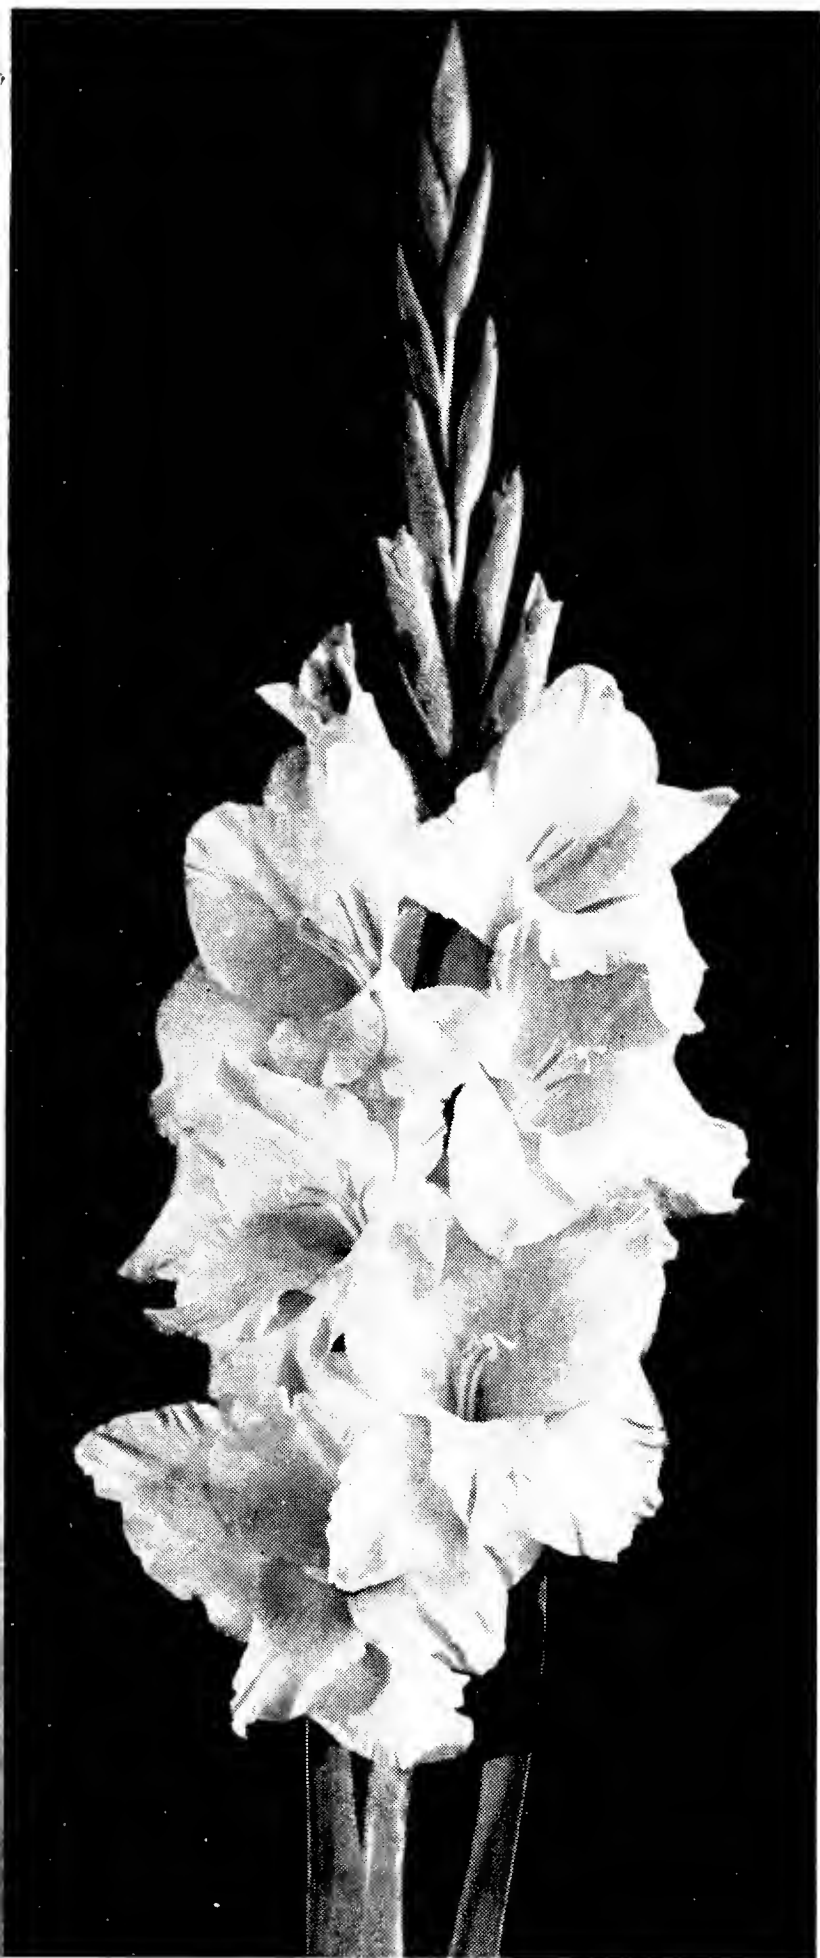

"The two bulbs of this (Conquest) you sent me have both bloomed and I think it has the most beautiful color combination of any flower I have seen, not Glads alone, but in any flower." Harold R. Sheedy, N. H.

"Conquest pleases us tremendously. Its delicate color and refinement appeal to us more than any of the newer Gladioli. We congratulate you upon its high rating and feel that it is richly deserved." Erick Becker, Ore.

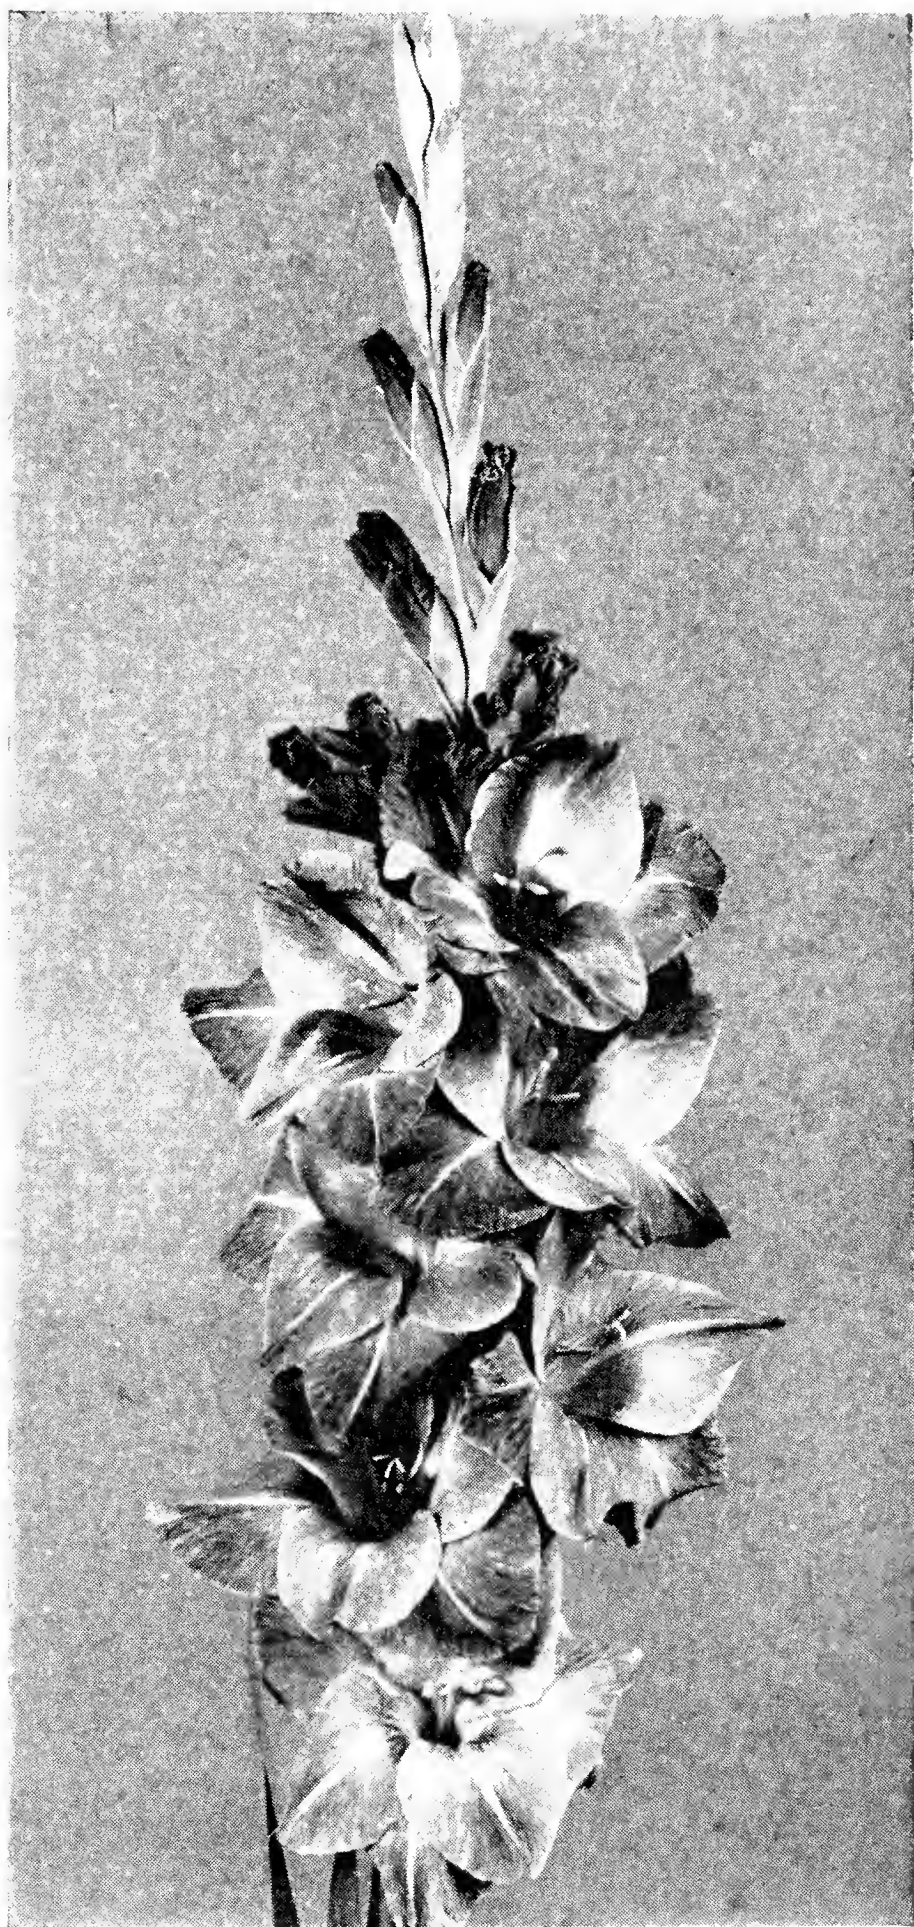

Conquest won first place as the best new introduction at the fortnightly meeting of the New England Gladiolus Society, Aug. 8, 1937.

SIEGFRIED (1936). A novelty Glad with rather small florets but many of them open at one time. Seems to do best when bloomed in cool weather but I have a few good reports from the East. It is being well received in England and has been a prize winner there. In color it is rose pink overlaid red with white throat and white splashes on the upper petals. L. 60c each; M. 40c each; S. 30c each; Blts. 10 for 40c.

FLAMING METEOR (1934). Bright rich red self. Five or six large round flowers open on about the tallest spikes of any variety I grow. Not always perfectly faced from large bulbs, yet they average much better in facing than some other popular reds. Very vigorous. Have had fine reports on this from the middle west. Not a rapid propagator but makes a fair number of bulblets which grow quite readily. The demand for small stock and bulblets was much heavier than I could supply last year. L. 80c per 10, \$4.50 per 100; M. 40c per 10, \$2.80 per 100; S. 20c per 10, \$1.60 per 100; Blts. 40c per 100, \$2.50 per 1000.

CONQUEST

JOHANN S. BACH

"Flaming Meteor, Colossus, and Rima are ahead of anything else in the garden in vigor." H. R. Sheedy, N. H.

"This variety (Flaming Meteor) did very well for me last summer. I won a first prize at the Boston Show of the N. E. G. S. with it." W. W. Wyman, Mass.

SERENADE (1934). A pretty shade of pink with white throat. Good number of blooms open but not a very strong grower. L. 10c each.

CHRISTABEL (1933). A very pretty large light pink with cream throat having seven to ten blooms open on a slender spike. A good flower but unfortunately, this makes unattractive bulbs. L. 10c each; M. 10 for 50c; BIts. 100 for 40c.

GENERAL LIST OF VARIETIES

The size of bulbs is denoted by letters, L. meaning large bulbs or those 1¼ inch and up in diameter; M. meaning medium bulbs or those ¾ to 1¼ inch; S. meaning small bulbs or those ⅜ to ¾ inch; Blts. referring to bulblets.

ALAYNE (Kinyon). A rich lustrous lilac flower of most beautiful shade. Spikes inclined to be rather short with me. L. 60c each; M. 40c each; S. 25c each; Blts. 10 for 30c.

ALBATROS (Pfitzer). Standard snow white Glad. Well known. L. 10 for 50c; M. 10 for 30c; S. 10 for 15c; Blts. 100 for 15c.

ALIGHT (Hornberger). A sport of Aflame and much like that variety but with salmon rose flower blotched white in the throat. Large and a fine flower. More attractive than its parent. L. 35c each; M. 25c each; S. 15c each; Blts. 10 for 20c.

ALF. M. LANDON (Stewart). A new bright red commercial. I have not seen this sufficiently to judge it but it should be a good florists' flower, I think. L. \$1.00 each; Blts. 10c each.

ALLEGRO (Pfitzer). Perhaps the most attractive of Pfitzer's medium blues with its long spikes of clear colored flowers. A slow propagator with me. L. 60c each; M. 45c each; S. 35c each; Blts. 15c each.

ALLEMANIA (Pfitzer). A giant bright red. Deep in color but more bright and lustrous than Com. Koehl but usually has better facing. Probably the largest in its color class. Sometimes crooks in adverse weather. Good propagator. L. 50c each; M. 30c each; S. 20c each; Blts. 10 for 25c.

ALRAUNE (Pfitzer). Cherry pink with cream throat. A trifle like Siegfried in color but a Prim hybrid, less opening, less blooms than that variety. L. 60c each; M. 40c each; S. 20c each; Blts. 10 for 60c.

AMADOR (Kingsley). A standard bright red commercial. L. 50c for 10; M. 10 for 35c; S. 10 for 20c; Blts. 100 for 40c.

AMBERGLOW (Palmer). A deep yellow shaded golden amber. Quite early. Tall and a very attractive flower. It should make a good commercial. Prolific. L. \$1.50 each; M. 90c each; S. 50c each; Blts. 10 for 35c.

AMRITA (Palmer). A much improved Wasaga, being a strong growing ruffled good sized buff colored flower. L. \$4.00 each; Blts. 50c each.

ANGELES (Palmer). A beautiful rich pink with white throat. This should make a wonderful commercial. Good propagator. L. \$2.25 each; M. \$1.50 each; S. \$1.00 each; Blts. 1 for 20c.

ARABELLA (Pfitzer). One of the best black reds. Large and tall. L. 40c each; M. 25c each; Blts. 10 for 60c.

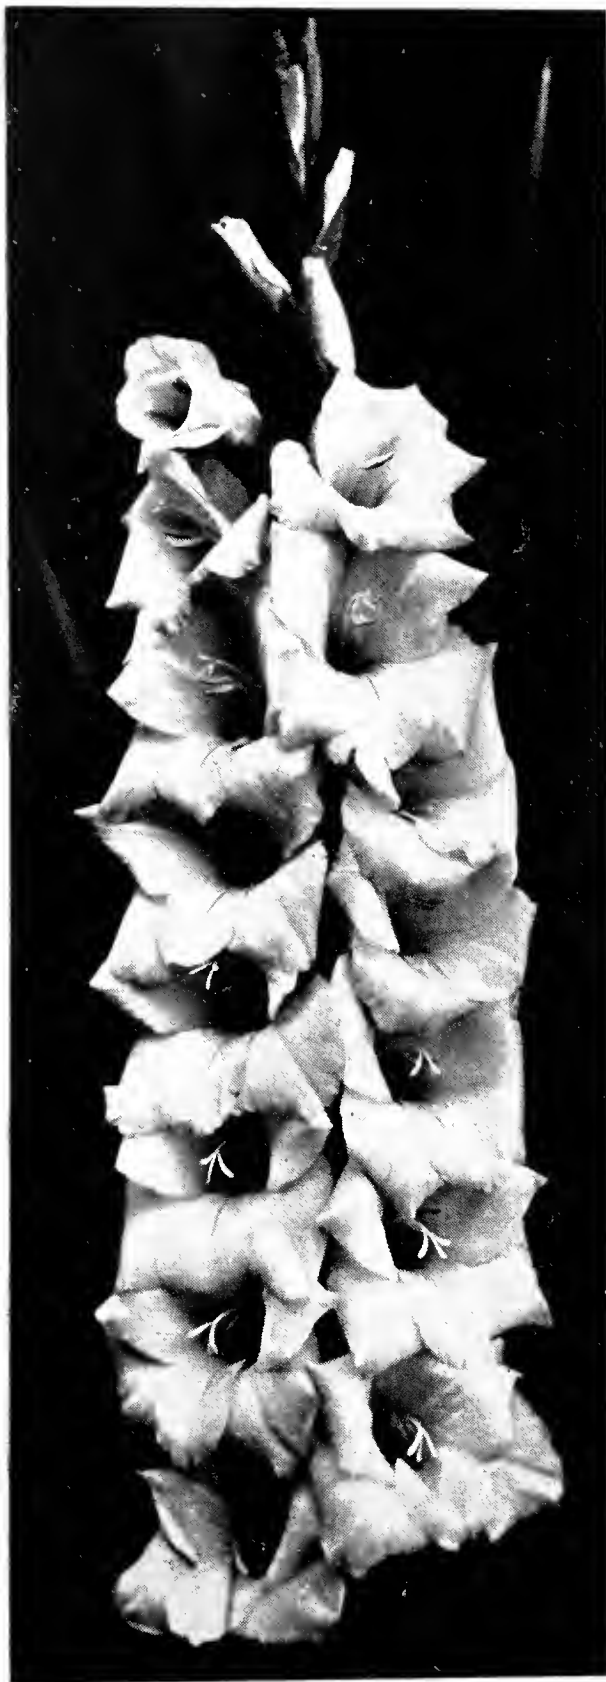

ARETHUSA (Fischer-Baerman). Heavily ruffled apricot with cream throat. M. \$4.50 each; Blts. \$1.00 each.

ARIADNE (Mitsch-Baerman). White with striking red blotch. At times the upper petals are tinted with red as though reflecting the blotches of the throat. This is one of the easiest growers and most consistent performers in that nearly every bulb gives a tall spike of well faced large flowers. L. \$2.00 each; M. \$1.50 each; S. \$1.00 each; Blts. 10 for \$2.00.

AUTUMN GLORY (Errey). A very richly colored smoky with a goodly number of florets open. Good propagator. L. 10 for \$2.40; M. 10 for \$1.20; S. 10 for 70c; Blts. 10 for 25c.

- BEACON** (Palmer). Red salmon with large cream blotches. One of the finest of the Palmer varieties, and one which does well under very adverse conditions. This gives promise of being one of the most popular varieties in the near future. L. 65c each, 10 for \$5.00; M. 40c each, 10 for \$3.00; S. 25c each, 10 for \$2.00; Blts. 10 for 50c, 100 for \$3.00.

- BLACK OPAL** (Errey). The finest of all the black reds with very long spikes having eight or ten perfectly faced blooms open at once. Fine propagator and strong grower. A real acquisition. L. \$4.50 each; M. \$3.50 each; S. \$2.00 each; Blts. 50c each.
- BLUE ADMIRAL** (Christ). A good rich dark blue-violet with long spikes. Probably the best commercial variety in its color and price class. The newer Robert Burns may prove better. L. 10 for \$1.00; M. 10 for 60c; S. 10 for 40c; Blts. 100 for 75c.
- BLUE BEAUTY** (Pfitzer) (Blaue Schonheit). One of the most vigorous growing and strongest of the new blues. Quite large flowers of medium shade. Heavy producer of large bulblets which grow well. L. \$1.00 each; M. 60c each; S. 40c each; Blts. 10 for 70c.

MISS NEW ZEALAND

To gild refined gold, to paint the lily,
To throw a perfume on the violet,
To smooth the ice, or add another hue
Unto the rainbow, or with the taper-light
To seek the beauteous eye of heaven to garnish,
Is wasteful and ridiculous excess.
